Strategic Foundation

The Name

momently

We went with *momently* (lowercase **m**) to match the clean, approachable style that momentum uses across its branding, keeping a corporate identity feeling human and modern.

Starting with a lowercase letter lowers the stakes, proving that tracking your day shouldn't feel like rigid administrative audit.

Instead of making you look backwards to guess how you spent big chunks of your week, *momently* is a natural extension of the organization's design that lets developers casually capture their active hustle and quick wins exactly as they happen because every moment counts.

The Slogan

EVERY MOMENT COUNTS

Our slogan directly bridges developer reality with the broader mission of momentum. In software engineering, high-impact results aren't born from massive monolithic blocks of time, they are built incrementally through micro-moments - a brilliant line of code, a quick breakthrough during stand-up or a rapid bug fix.

By tracking time precisely and effortlessly, we ensure that none of these valuable micro-contributions get lost in the noise of administrative paperwork. It shifts the narrative of the timesheets from a compliance chore to a value-capturing tool.

Mission

To transform the way software development teams understand and optimize their most valuable asset - time. We deliver an intelligent AI-driven platform

that turns manual logging into strategic advantage giving developers visibility and managers actionable insights for high performing, balanced teams.

Vision

To empower development teams with an intelligent, AI-driven time analytics platform that eliminates manual overhead, delivers predictive insights and seamlessly integrates with existing development tools. We move beyond basic logging to measurable impact.

Core Values

1. Precision - Every moment counts
2. Clarity - No more guesswork
3. Empowerment - Data that drives decisions
4. Simplicity - Time tracking that doesn't feel like work

Logo and Iconography

The Logo

The momentarily logo is a modern reinterpretation of the classic hour glass. reengineered for the developer's world.

The hour glass symbolises the flow of time. Instead of watching sand slip away the logo visualizes raw time (in amber) flowing down and snapping into place as steel azure data blocks. This represents the transformation of the time into tangible, structured data.

Logo Usage Rules

Rule	Specification
Clear Space	The logo must be surrounded by a clear space equal to the height of the letter 'm' in the logotype
Minimum Size	Digital: 32px in height. Print: 12mm in height
Allowed Formats	
Forbidden Treatments	Do not stretch, distort, recolor (except approved monochrome versions), apply drop shadows or rotate the logo.

Iconography

We utilise Angular material symbols for our icons.

Icon sizing: Icons are used at 16px, 20px and 24 px based on context.

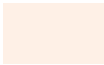

Stroke width: A uniform stroke width of 2px is used across all icons to ensure visual consistency.

Colour System

Primary Colors

Color	Name	Hex	RGB	HSL	Usage
	Steel Azure	#0F4C91	rgb(15,76,145)	hsl(212,81%,31%)	Primary brand color, main identity color, primary navigation, high emphasis branding, primary buttons and key UI elements.
	Tech Blue	#1A65BF	rgb(26,101,191)	hsl(218,76%,43%)	Secondary interactive color, hover states, active navigation items and link hover effect.
	Chocolate	#E07830	rgb(224,120,48)	hsl(25,74%,53%)	Accent color, AI features, automated entries, active timers and key call to action highlights.

Secondary Colors

Color	Name	Hex	RGB	HSL	Usage
	Pale Sky	#BFD4F4	rgb(191,212,244)	hsl(216,71%,85%)	Background tint, card backgrounds, subtle information containers, section dividers and hover backgrounds.
	Linen	#FEF0E6	rgb(254,240,230)	hsl(25,92%,95%)	Primary surface, main application background, dashboard surfaces, container backgrounds and light mode base.
	Deep Navy	#0C1C2E	rgb(12,28,46)	hsl(212,59%,11%)	Dark mode base - dark mode backgrounds, inverse applications high contrast text on light surfaces and footer backgrounds.

Semantics Colors

Color	Name	Hex	RGB	HSL	Usage
	Steel Azure Light	#D6E4F5	rgb(214,228,245)	hsl(215,61%,90%)	Informational - AI suggestions, system notifications, help text, tooltip, and onboarding guidance.
	Mint	#B8E6B3	rgb(184,230,179)	hsl(45,75%,84%)	Success - Approved timesheets, completed actions, confirmation messages, and positive feedback states.
	Amber Light	#F5E6B8	rgb(245,230,184)	hsl(45,75%,84%)	Warning - Pending reviews, unassigned time blocks, cautionary messages and incomplete tasks.
	Rose	#F5C8C8	rgb(245,200,200)	hsl(0,69%,87%)	Error - Overdue metrics, destructive actions, validation errors and system errors.

WCAG Contrast Ratios

Primary Colors Pairings

Foreground	Background	Ratio	WCAG Rating	Use case
Steel Azure	White	7.8:1	AAA	Primary text on white backgrounds
Steel Azure	Linen	7.0:1	AAA	Primary text on light surfaces
Steel Azure	Pale Sky	4.8:1	AA	Primary text on tinted backgrounds
Steel Azure	Steel Azure Light	4.6:1	AA	Primary text on informational backgrounds.
White	Steel Azure	7.8:1	AAA	White text on primary buttons.
White)	Tech Blue	5.8:1	AA	White text on hover/interactive elements
White	Deep Navy	15.2:1	AAA	White text on dark mode backgrounds
Deep Navy	White	15.2:1	AAA	Dark text on white background
Deep Navy	Linen	12.8:1	AAA	Dark text on light surfaces
Deep Navy	Pale Sky	8.7:1	AAA	Dark text on tinted backgrounds

Accent Colors Pairings

Foreground	Background	Ratio	WCAG Rating	Use case
Chocolate	Steel Azure	5.2:1	AA	Accent text on primary backgrounds
Chocolate	Tech Blue	4.8:1	AA	Accent text on secondary backgrounds
Chocolate	Deep Navy	6.8:1	AAA	Accent text on dark mode backgrounds
Deep Navy	Chocolate	6.8:1	AAA	Dark text on accent backgrounds

Accent Colors Pairings

Background	Ratio	Foreground	WCAG Rating	Use Case
Steel Azure Light	7.2:1	Deep Navy	AAA	Text on information backgrounds
Steel Azure Light	4.6:1	Steel Azure	AA	Primary accent on informational background
Mint	8.5:1	Deep Navy	AAA	Text on success background
Amber Light	8.1:1	Deep Navy	AAA	Text on warning background
Rose	8.8:1	Deep Navy	AAA	Error Specific text

Interactive element Pairings

Foreground	Background	Ratio	WCAG	Use Case
Steel Azure	Linen	7.0:1	AAA	Primary Button text on light surfaces
White	Steel Azure	7.8:1	AAA	Primary button text
White	Tech Blue	5.8:1	AA	Hover button text
Steel Azure	Pale Sky	4.8:1	AA	Ghost button text
Steel Azure	Steel Azure Light	4.6:1	AA	Active state indicators
Deep Navy	Linen	12.8:1	AAA	Input text on light surfaces

Typography

Font Family

Font	Usage	Source
Special Gothic Expanded One	Primary display font for high impact headers and main branding statements. Designed for confidence	Google Fonts (Self-hosted)
DM Sans	Secondary display face for internal sub-headings and module titles. Balanced and professional.	Google Fonts (Self-hosted)
Inter	Optimized for on-screen readability on scale. Used for all primary body copy, dashboard labels and descriptions.	Google Fonts (Self-hosted)
Roboto Mono	Used for all numeric data, timestamps, running timers and technical logs.	Google Fonts (Self-hosted)

Typography Scale

Style	Font Size	Line Height	Weight	Usage
Display	56px / 3.5rem	1.1	700	Hero section, marketing landing pages.
H1	40px / 2.5 rem	1.2	600	Main page titles.
H2	32px / 2rem	1.25	600	Section Headings.
H3	24px / 1.5rem	1.3	500	Sub-section headings, card titles.
H4	18px / 1.125rem	1.4	500	Minor headings, modal titles.
Body	16px / 1rem	1.5	400	Minor headings, modal titles.
Small	14px / 0.875rem	1.5	400	Descriptions, helper text, metadata.
Caption	12px / 0.75rem	1.5	400	Timestamps, tags, fine print.

Design Tokens

Spacing Scale

Token	Value	Usage
Spacing -1	4px	Padding for badges, dense components.
Spacing -2	8px	Spacing icons and labels, padding in small buttons
Spacing -3	12px	Padding in medium buttons for cards, large gap between sections.
Spacing -4	16px	Base padding for cards, large gap between sections.
Spacing -6	24px	Padding for modal content, sidebars.
Spacing -8	32px	Major section padding.
Spacing -12	48px	Large page sections, hero padding.
Spacing -16	64px	Maximum padding for container elements.

Borders & Radius

Token	Value
radius-sm	4px
radius-md	8px
radius-lg	12px
radius-full	9999px

Shadows

Token	Value	Usage
shadow-sm	0 1px 2px 0 rgb(0 0 0 / 0.05)	Subtle depth for cards.
shadow-md	0 4px 6px -1px rgb(0 0 0 / 0.1), 0 2px 4px -2px rgb(0 0 0 / 0.1)	Dropdowns, modals.
shadow-lg	0 10px 15px -3px rgb(0 0 0 / 0.1), 0 4px 6px -4px rgb(0 0 0 / 0.1)	Prominent UI overlays.

Layout, Spacing and responsiveness

The 8pt Grid System

All spacing and layout are built on a geometric rule: the 8pt grid. This ensures absolute consistency and rhythm across all components and responsive layouts.

Breakpoints

The system adapts seamlessly across all device sizes.

Breakpoint	Size	Description
sm	640px	Mobile portrait
md	768px	Table portrait / Mobile landscape
lg	1024px	Table landscape / Small desktop
xl	1280px	Large desktop
2xl	1536px	Extra large desktop

Mobile: Layouts stack vertically. Navigation collapses into a hamburger menu. Sidebars are hidden by default and can be toggled as a slide out panel.

Desktop: Full sidebar navigation is displayed. Content areas use a multi-column grid.

Container

The main application content is contained in a max-width: 1280px container, centered with auto margins.

Accessibility Standards

Color Contrast

All color pairings used in the UI meet at least AA compliance. We have also designed AAA compliance in body text and high emphasis elements, as shown in our palettes.

Focus Indicators

A visible focus ring is present on all interactive elements. This ring uses our Steel Azure color with a 2px width, ensuring high contrast against all backgrounds.

Keyboard Navigation

All the interactive elements can be accessed from the Tab key. The buttons, links and form controls have a visible keyboard focus state. Lastly, users can navigate the application without requiring a mouse.

Screen Reader Support

Semantic HTML elements are used in the application. The form fields include descriptive labels. Images and icons represent meaning and include alternative text. Decorative icons are hidden from assistive technology where appropriate.

Responsive Design

The interface adapts to the desktop, tablet and mobile device. Touch targets are designed to be at least 44 by 44 pixels where applicable.

Motion and Animation

Animators are subtle and do not interfere with usability. The motion respects the user's prefers-reduced-motion system setting where supported.

Audit Score

The application was evaluated using automated accessibility tools during development.

Voice & Tone

Voice

This is about the consistency across all the interactions. The buttons, menus and notifications, and error messages. Our systems voice is:

- Professional: it speaks with authority, which is appropriate for a workspace tool
- Friendly: it is approachable and human, we do not want the system to feel robotic and cold
- Clear: it uses plain language, such that it is easy to understand
- Supportive: it helps the user succeed, and never blames or criticizes them for mistakes
- Confident: it is trustworthy, we want users to be able to trust what it says

Tone

The tone is about changing to adapt to the situation. Examples of how Momently's tone changes depending on the situation include:

- User signing in: welcoming tone - "Welcome back, Linda!"
- Action succeeding: positive - "Timesheet submitted successfully"
- User making a mistake: helpful - "End date must be after start date"
- Warning the user: calm - "This action cannot be undone"
- Confirmation: reassuring - "Are you sure you want to delete this task"
- User waiting: patient - "Your report is being generated"
- User completing a goal: celebratory - "You've logged 40 hours this week. Great job!"

UI Text Examples

Buttons

They are user oriented, and have clear labels. Example if these include:

- Save Changes
- Submit Timesheet
- Create Project
- Delete Task
- Cancel
- Yes, Delete

Success Messages

They celebrate the user's success with positive and clear feedback. Examples of this includes:

- "Project created successfully"
- "Timesheet submitted successfully"
- "Leave request submitted successfully"
- "Profile updated successfully"
- "Item deleted successfully"

Validation and Error messages

Our error messages are helpful and not harsh. They explain what went wrong and how to fix it. Examples of this includes:

- "Project name required"
- "End date must be after the start date"
- "Please enter a valid company email address"
- "You already have an approved leave that overlaps with these dates"

Confirmations

Our intention is to be calm and reassuring when telling the user about an irreversible action. Examples of this includes:

- "Are you sure you want to delete this task? This action cannot be undone"
- "Are you sure you want to submit this timesheet? You won't be able to edit it afterwards"
- "Are you sure you want to cancel this leave request?"
- "Are you sure you want to delete this project? All associated tasks and time entries will be archived"
