1. Introduction

1.1. What is Momently?

Momently is an all in one time-tracking and workforce management platform designed to help teams log their work hours, manage projects, submit timesheets, and track productivity.

1.2. Who is this manual for?

The manual is for everyone using Momently, whether you are a developer logging your time, or a manager approving team timesheets, or an admin managing workspaces and users.

2. Getting started

2.1. Sign Up

Enter your first and last name

The screenshot shows the Momently sign-up page. On the left, there's a hero section with the Momently logo and the text "Start Your AI Productivity Journey". Below this, it says "Join over 10,000+ professionals who have regained 5 hours per week by automating their time tracking with Momently." There are also two cards: "ACTIVE PROJECTS" showing a progress bar at 75% and an "AI Suggestion" card that says "Found 2.5 untracked hours" with a button "Apply to Timesheet".

On the right, the "Create your account" form is shown. It has the following fields and elements:

- Name** and **Surname** input fields. An annotation "Enter your first and last name" points to the Surname field.
- Work Email** input field with the example "john@company.com".
- Password** input field with a strength indicator. An annotation "Enter your email and password" points to this field.
- A checkbox for "I agree to the Terms of Service and Privacy Policy."
- A blue **Create Account** button. An annotation "Create your account" points to this button.
- Below the form, there's a section "OR SIGN UP WITH" with buttons for Google and Microsoft.
- At the bottom, a link: "Already have an account? Sign in here"

Step 1: Go to the Momently sign-up page.

Step 2: Fill in your details:

- Name: your first name
- Surname: your last name
- Work Email: your company email address (for example john@company.com)
- Password: at least 8 characters, with a mix of letters and numbers. Click the eye icon to show or hide what you type.

Step 3: Tick the box to agree to the Terms of Service and Privacy Policy.

Step 4: Click Create Account.

Step 5: Check your email for a verification link and click it to verify your account. You're now ready to sign in.

Note: You can also sign up with your Google or Microsoft account using the buttons under "OR SIGN UP WITH". If you already have an account, click Sign in here.

2.2. Sign In

Sign in to your account

Enter your details to access your workspace.

Work Email

✉ john@company.com

Microsoft

Don't have an account? [Sign up here](#)

Step 1: Go to the Momently login page.

Step 2: Enter your Work Email and Password. Click the eye icon to show or hide your password, and tick Remember me if you want to stay signed in on this device.

Step 3: Click Sign In.

Step 4: You'll be redirected to your dashboard.

Note: If you've enabled Multi-Factor Authentication (MFA), you'll need to enter your TOTP code from your authenticator app.

Note: If you forgot your password, click Forgot password? under the password box. You can also sign in with Google or Microsoft, or click Sign up here if you do not have an account yet.

2.3. Dashboard

After you sign in, the Dashboard opens. It gives you a quick summary of your day.

Step 1: Click Dashboard in the left menu at any time to return to this page.

Step 2: You'll see these cards:

- Active timer: the timer that is running, with Stop and Pause buttons
- Pending approvals: the number of timesheets waiting for your review (click Review approvals). Managers only
- Active projects: projects you contribute to (click View projects)
- My tasks in progress: tasks you are working on now (click a task to open it)
- Today's calendar: events from your calendar integration
- Hours logged: your hours for today and for this week (out of 8h and 40h)
- Upcoming deadlines: tasks due in the next 7 days

Note: While a timer is running, a Timer Running box also appears at the bottom of the left menu on every page. Click its arrow to go back to the timer.

Note: When no timer is running, the Active timer card shows NOT RUNNING and a Start timer button.

The screenshot shows the Momently dashboard for user Amahle Dlamini. The interface is clean and modern, with a dark blue sidebar on the left containing navigation links: Dashboard, Timesheets, Log Time, Projects, My tasks, Calendar, Insights, Team, and Settings. The main content area has a light orange background with a header 'Good morning, Amahle' and a sub-header 'Here's what needs your attention across projects you manage.' The dashboard is divided into several widgets: 'Active timer' (NOT RUNNING, Start timer button), 'Pending approvals' (49, Review approvals link), 'Active projects' (1, View projects link), 'My tasks in progress' (1 active, Audit Existing Crystal Reports task), 'Today's calendar' (Nothing else scheduled for today), 'Hours logged' (Today: 0h 0m, This week: 0h 51m of 40h), and 'Upcoming deadlines' (No deadlines in the next 7 days). The footer includes the copyright '© 2026 momently' and the tagline 'Every Moment counts'.

3. Core Features

3.1. Timer (Logging Time)

The screenshot displays the 'Log Time' interface in the Momently application. On the left is a dark blue sidebar with navigation links: Dashboard, Timesheets, Log Time (highlighted), Projects, My Tasks, Calendar, Leave Requests, Reports, Insights, Team, and Settings. At the bottom of the sidebar is a user profile for 'Enzokuhle Khumalo, Developer'. The main content area has a header 'Log Time' with a subtitle 'Log and manage your time entries.' and date filters for 'Thu, Jul 30' and 'Day'. Below the header are two buttons: '+ Add Manual Time Entry' and 'Start Automatic Time Entry'. A modal window titled 'Automatic Time Entry' is open, prompting the user to 'Set your project details, then start the timer.' It contains dropdown menus for 'Project' (selected: Mobile App Development) and 'Task (Optional)' (selected: No task selected), a text field for 'Notes (Optional)' (placeholder: What are you working on?), and a large digital clock showing 'Elapsed Time' as '00:00:00'. There are 'Start Timer' and 'Cancel' buttons next to the clock. Below the modal is a section for 'Today's Entries' showing a 'Total: 0m' and filters for status (All, Draft, Submitted, Approved, Rejected), project (All projects), and date range (2026/07/30 to 2026/07/30). A table with columns 'Time', 'Project / Task', 'Type', 'Duration', 'Description', and 'Actions' is shown, but it contains no data, with a message stating 'No entries match the selected filters.'

3.1.1. Start a Timer

Step 1: In the left menu click Log Time, then click Start Automatic Time Entry.

3.2. Manual Time Entry

The screenshot displays the Momently web application interface for logging time. On the left is a dark blue sidebar with navigation links: Dashboard, Timesheets, Log Time (highlighted), Projects, My Tasks, Calendar, Leave Requests, Reports, Insights, Team, and Settings. At the bottom of the sidebar is a user profile for 'Enzokuhle Khumalo' with the initials 'EK' and the role 'Developer'. The main content area is titled 'Log Time' and includes a subtitle 'Log and manage your time entries.' At the top right of the main area are buttons for 'Thu, Jul 30', 'Day', 'SUBMITTED', and 'Submit Timesheet'. Below the subtitle are two buttons: '+ Add Manual Time Entry' and 'Start Automatic Time Entry'. The 'Manual Time Entry' form is open, showing fields for 'Project' (Mobile App Development), 'Task (Optional)' (No task selected), 'Entry Type' (Manual), 'Start Time' (09:00), 'End Time' (10:00), and 'Duration' (1h). There is a text area for 'Description (Optional)' with the placeholder 'What did you work on?'. At the bottom right of the form are 'Cancel' and 'Save Entry' buttons. Below the form, a summary bar shows 'Today's Entries' and 'Total: 1h 2m'. The footer includes the copyright notice '@ 2026 momently' and the tagline 'Every Moment counts'.

3.3.2. *View Timesheet Details*

Step 1: Use the week selector at the top right to choose the week you want.

Step 2: You'll see:

- Week: the dates the timesheet covers
- Status: Draft, Submitted, Approved, or Rejected
- Task table: the hours logged for each task on each day, Monday to Sunday
- Total and Daily Total: the sum of all hours for each task and each day
- Locked and Reason: whether the timesheet can still be edited, and the manager's reason if it was rejected

Step 3: If the status is Draft (Locked: No), you can edit or delete its entries from the Log Time page.

3.3.3. *Submit a Timesheet*

Step 1: Open the Draft timesheet for the week you want to submit, or stay on the Log Time page.

Step 2: Review all time entries to ensure they're correct.

Step 3: Click the Submit Timesheet button at the top right of the Log Time page.

Step 4: Confirm submission.

The timesheet is now SUBMITTED and locked. Your manager can now review and approve it.

Note: Once submitted, you cannot edit the entries. If changes are needed, your manager must Reject it first.

After you submit, the badge at the top of the Log Time page changes to SUBMITTED, a banner says "The timesheet is awaiting review." and the Add Manual Time Entry, Start Automatic Time Entry and Submit Timesheet buttons are greyed out.

Edit
the top
project
role.

Step 2:
The Edit
opens.

3. Edit a Project

Open a project
Projects page.
Managers see an
project button at
right, next to the
status and your

Click Edit project.
Project window

Step 3: Change any of these details: Project name, Description, Status, Budget hours, Hourly rate, Budget cost, Start Date and End Date. Type a date or click the calendar icon.

Step 4: Click Save changes to keep your edits, or Cancel to close the window without saving.

Note: The Edit project button is only shown to managers of that project. Developers can view the project but not change it.

3.4.4. View the Project Forecast

Step 1: Open a project from the Projects page, then click the Forecast tab.

Step 2: Check the three cards at the top: Overall Risk (for example AT_RISK), Forecast Confidence (for example MEDIUM, with how many evidence signals are available) and Forecast Completion (the estimated delivery date). "Last synced" shows when the forecast was last refreshed.

Step 3: Under Budget Forecast, the chart compares the hours Used, the Forecast and the Budget. Forecast Metrics shows the Remaining Budget, Forecast Overrun, Expected Delay and Remaining Work.

Step 4: Scroll to Task Progress to see the percentage complete with the Total, Completed and Remaining task counts. Delivery Forecast shows the Recent Velocity, Remaining Work, Forecast Date and Schedule Risk. A Limited velocity data warning appears when there is little recent time-tracking history.

Step 5: Read the AI Forecast Explanation. It gives a summary of the forecast, a Risk Analysis and a list of Contributing Factors, such as tasks completed, the schedule delay in days and whether GitHub and Jira evidence is available.

Step 6: Read Recommendations for suggested actions, for example Review Task Progress. Forecast Evidence shows how much evidence is available (for example 4 / 6), the Task estimate coverage bar, whether GitHub and Jira are available, and tags for Available evidence and Missing evidence.

Additionally, recent velocity data is insufficient with 0.0 hours in the lookback period, and external evidence from GitHub and Jira is unavailable.

Contributing Factors

- 0 out of 3 total tasks are completed, leaving 3 remaining tasks with a completion percentage of 0.0%.
- The schedule is delayed by 133 days, moving the forecast end date from 2026-10-31 to 2027-03-13.
- Velocity data indicates insufficient data with 0.0 hours in the lookback period.
- Evidence from external sources (GitHub and Jira) is unavailable.

Recommendations
Suggested actions based on the current forecast

- Review Task Progress**
Examine the 3 remaining tasks and their estimated remaining hours to address the AT_RISK task progress and schedule status.
- Investigate External Evidence Sources**
Verify the integration status for GitHub and Jira since evidence from both sources is currently unavailable.

Every Moment counts

Step 7: Click Sync Forecast at the top right to refresh the forecast. The button shows Syncing... while it works.

Note: If a project has no forecast yet, the tab shows "No project forecast yet". Click Generate Forecast to create the first one.

Project Forecast AI Powered

Delivery predictions based on project progress, workload, task estimates and recent activity.

Syncing...

No project forecast yet

Generate the first forecast to analyse the project's delivery outlook, risk and expected completion.

Generate Forecast

Note: The forecast is only as strong as its evidence. Add task estimates, log time against tasks and connect GitHub and Jira under Settings > Integrations to fill in the missing evidence.

3.5. Tasks

3.5.1. View My Tasks

My Tasks

All tasks assigned to you across projects.

Connect to Jira | New Task

271 Total Tasks | 22 Active (Includes To Do & In progress) | 246 Done | 3 Blocked

STATUS: All | Search tasks, projects or jira tickets | ☐ Show Completed ☐ Show Blocked

TASK	PROJECT	JIRA TICKET	ASSIGNED TO	STATUS	PRIORITY	DUE DATE	ESTIMATED	ACTUAL	ACTIONS
Review API integration PR	Mobile App Development	—	Enzokuhle Khumalo	In Progress	Medium	02 Oct 2026	5h	5h	View
UI polish for dashboard	Mobile App Development	—	Enzokuhle Khumalo	In Progress	Medium	03 Oct 2026	6h	6h	View
Refactor time tracking service	Mobile App Development	—	Enzokuhle Khumalo	To Do	Medium	04 Oct 2026	4h	4h	View
Design new nav bar	Mobile App Development	MOM-300	Enzokuhle Khumalo	To Do	Medium	-	0h	0h	View
Add dark mode toggle	Mobile App Development	MOM-301	Enzokuhle Khumalo	To Do	Medium	-	0h	0h	View

Step 1: Click My Tasks in the left menu.

Step 2: You'll see all tasks assigned to you across projects, with summary cards for Total Tasks, Active, Done and Blocked.

Step 3: Each task shows:

- Task: what the task is about
- Project: which project it belongs to
- Status: To Do, In Progress, Done or Blocked
- Priority: Low, Medium, High or Critical
- Due Date, plus the Estimated and Actual hours

Step 4: Click View in the Actions column to open the Task Detail window (title, description, project, status, priority, dates and hours). Click Close to return to the list.

Note: Use New Task (top right) to create a task, and Connect to Jira to link your tasks to Jira tickets.

The screenshot shows the Momently 'My Tasks' page. A 'Task Detail' modal is open, displaying the following information for the task 'Review API integration PR':

- TITLE:** Review API integration PR
- DESCRIPTION:** No description provided.
- PROJECT:** Mobile App Development
- JIRA TICKET:** -
- STATUS:** In Progress
- PRIORITY:** Medium
- ASSIGNED TO:** Enzokuhle Khumalo
- DUE DATE:** 02 Oct 2026
- ESTIMATED HOURS:** 5h
- ACTUAL HOURS:** 5h
- PARENT TASK:** -
- COMPLETED AT:** -
- CREATED AT:** 29 Sept 2026, 02:32
- LAST UPDATED:** 29 Sept 2026, 02:32

The modal has 'Edit' and 'Close' buttons at the bottom. In the background, the 'My Tasks' list is visible, showing tasks like 'UI polish for dashboard' and 'Refactor time tracking service'.

3.5.2. View Tasks for a Project

Step 1: Open a Project from the Projects page.

Step 2: Scroll down to the Tasks tab.

Step 3: You'll see all tasks for that project, including:

- Tasks assigned to others
- Task status and priority

- Who the task is assigned to

Note: As a Developer, you can view all tasks in projects you're assigned to. Managers and Admins can view all tasks in their workspace

The screenshot shows the Momently dashboard. On the left is a dark blue sidebar with the Momently logo and navigation links: Dashboard, Timesheets, Log Time, Projects, My Tasks, Calendar, Insights, and Settings. The main content area has a header with the text "Revamp of the external client-facing portal". Below this is a filter bar with six cards: Start Date (Jun 1, 2026), End Date (Oct 31, 2026), Budget Hours (400h), Hourly Rate (R80), Budget Cost (R32000), and Team Members (3). Below the filter bar are three tabs: Overview, Tasks (selected), and Forecast. The Tasks tab displays a table of tasks assigned to the project.

TASK	ASSIGNEE	STATUS	ESTIMATED	ACTUAL
Design New Portal Layout	EK Enzokuhle Khumalo	In Progress	12h	6.5h
Migrate Client Auth Flow	LM Lethabo Maseko	To Do	10h	0h
Build Document Upload Widget	NM Naledi Mphahlele	To Do	8h	0h

3.5.3. Filter and Search Tasks

Step 1: On the My Tasks page, use the filter bar:

Status dropdown: choose All, To Do, In Progress, Done or Blocked

- To Do: tasks not started
- In Progress: tasks currently being worked on
- Done: completed tasks
- Blocked: tasks that are blocked

Show Completed / Show Blocked: tick these boxes to include completed or blocked tasks in the list

Search: type a keyword to find tasks, projects or Jira tickets

Step 2: The list will update to show only matching tasks.

My Tasks

All tasks assigned to you across projects.

Design Dast	App Development	-	Enzokuhle Khumalo	To Do	Medium	-	6h	0h	View

3.5.4. Update Task Status

Step 1: Open the My Tasks page.

Step 2: Click the status dropdown on the task's row (Status column).

Step 3: Select the new status:

- To Do: task not yet started
- In Progress: task is being worked on
- Done: task is completed
- Blocked: task is blocked

The task status will be updated, and your team will see the progress.

3.5.5. Create a Task

Step 1: On the My Tasks page, click New Task at the top right. The Create New Task window opens.

Step 2: Fill in the details. Fields marked with an asterisk are required:

- Title: a short name for the task
- Description (optional): what needs to be done
- Project *: choose the project the task belongs to
- Jira ticket key (optional): enter an existing Jira ticket, for example SCRUM-123, to link it to this task
- Parent task: choose a parent task, or leave it as None
- Create Jira issue: the Skip Jira creation toggle controls whether a Jira issue is made. When Jira creation is skipped, no Jira issue will be created
- Status * and Priority *: for example To Do and Medium
- Estimated hours and Due date (optional)

Fields marked with * are required

Cancel Create Task

Step 3: Click Create Task, or Cancel to close the window without saving.

3.5.6. View and Edit a Task

Step 1: On the My Tasks page, click View in the Actions column. The task window opens with the estimated and actual hours, parent task, completed at, created at and last updated details.

Step 2: Click Edit to change the task. The fields become editable.

Step 3: Click Save Changes to keep your edits, or Cancel to discard them. In the view window, click Close to go back to the list.

Note: The diamond button next to View creates a Jira ticket for the task. A sync icon shows instead when the task is already linked to Jira.

3.5.7. View Team Tasks

Step 1: Click My Tasks in the left menu.

Step 2: Click the Team Tasks tab. The number beside each tab shows how many tasks it holds. Click My Tasks to go back to your own tasks.

TASK	PROJECT	JIRA TICKET	ASSIGNED TO	STATUS	PRIORITY	DUE DATE	ESTIMATED	ACTUAL	ACTIONS
Write documentation on feature	Mobile App Development	—	Zamokuhle Zwane	To Do	Medium	08 Oct 2026	22h	0h	View
Testing components	Mobile App Development	—	Zamokuhle Zwane	To Do	Medium	09 Oct 2026	9h	0h	View
Empty states for reports tab	Mobile App Development	MCM-304	Enzokuhle Khumalo	To Do	Medium	-	0h	0h	View
Notification bell dropdown	Mobile App Development	MCM-305	Enzokuhle Khumalo	To Do	Medium	-	0h	0h	View
Accessibility pass on forms	Mobile App Development	MCM-306	Enzokuhle Khumalo	To Do	Medium	-	0h	0h	View
Redesign the projects table	Mobile App Development	MCM-307	Enzokuhle Khumalo	To Do	Medium	-	0h	0h	View

Step 3: Use the Status dropdown, the search box, and the Show Completed and Show Blocked boxes to narrow the list.

Step 4: Each row shows the task, project, Jira ticket, who it is assigned to, status, priority, due date, and estimated and actual hours. Change a task's status from its dropdown, or click View to open the task.

Note: The small Jira icon next to View shows a diamond for tasks that are not linked to a Jira ticket yet, and a sync icon for tasks that already have one. The Team Tasks tab is available to Managers and Admins.

3.6. Calendar

The Calendar page shows your schedule so you can plan your work around meetings, calls and deadlines.

Step 1: Click Calendar in the left menu.

Step 2: Use Today to jump back to the current date, and the left and right arrows to move between months.

Step 3: Use the Month, Week and Day buttons at the top right of the calendar to change the view. The current date is highlighted.

Step 4: Check the colour key at the bottom: Meetings, Work, Calls and Deadlines.

Step 5: Click Connect calendar at the top right to link Google Calendar or Outlook and import your events.

Note: The calendar is read-only. Events only appear after you connect a calendar, and they also feed the Today's calendar card on your Dashboard.

3.7. Team

The Team page lets managers see everyone in the workspace and create new projects.

3.7.1. View Workspace Members

Step 1: Click Team in the left menu.

Step 2: At the top, the cards show the number of Workspace members and Projects.

Team
Manage workspace members and their project assignments.

Workspace members: 14
Projects: 8

Workspace Members

Search members...

MEMBER	EMAIL	PROJECTS	ACTIONS
TS Thabang Siduke	thabang.siduke@momentum.co.za	Mobile App Development, Backend API, Design System	⋮
EK Enzokuhle Khumalo	enzokuhle.khumalo@momentum.co.za	Mobile App Development, Legacy Reporting Migration, Client Portal Redesign	⋮
LM Lethabo Maseko	lethabo.maseko@momentum.co.za	Backend API, Client Portal Redesign	⋮

KM Karabo Mathebula	karabo.mathebula@momentum.co.za	Mobile App Development, Design System	⋮

© 2026 momently

Step 3: Under Workspace Members, the table lists each member with their Email and the Projects they are on. Type a name in the Search members box to find someone.

Step 4: Scroll down to see everyone. Members who are not on any project show "No projects". Use the three-dot menu in the Actions column for more options.

ID	Name	Email	Projects

CU	Cybernauts Unknown	cybernauts301@gmail.com	Mobile App Development
CN	Cyber Nauts	cybernauts301@outlook.com	Mobile App Development
ZZ	Zamokuhle Zwane	zamokuhle.ebit@gmail.com	Mobile App Development

3.7.2. Create a Project

Step 1: On the Team page, click New project at the top right. The Create a project window opens.

Step 2: Fill in the project details:

- Project name: for example Website redesign
- Budget hours: the total hours planned for the project
- Description: describe the project
- Hourly rate and Budget cost
- Start Date and End date: type the date or click the calendar icon

Step 3: Under Project manager, select one person from the dropdown.

Step 4: Under Developers, tick the box next to each team member who will work on the project. Scroll the list to see everyone.

Step 5: Click Create project. The button stays light until the required details are filled in. Click Cancel to close the window without saving.

3.8. Insights

The Insights page (Manager Insights) helps managers track project delivery, team workload and development activity across their projects.

Developers see Developer Insights instead. It is described at the end of this section.

3.8.1. View Manager Insights

Step 1: Click Insights in the left menu.

Step 2: At the top, the Weekly summary gives an AI-generated overview of the team's recent activity.

Step 3: Choose All My Projects, or click a single project (for example Mobile App Development), to change what the cards show.

Step 4: Scroll down to see the cards:

- Project completion forecast: actual progress against the forecast, the current progress percentage and the forecast completion date
- Team logged hours: hours logged by each member
- Burnout risk: members flagged for a check-in
- Task overview: total tasks and how many are Completed, In Progress, Open and Blocked
- Velocity: tasks completed per week compared with the rolling average
- Project health: a score out of 100 with the share of work On track, At risk or Behind

- GitHub activity: hours logged against commits, by member
- Jira tickets: the number of tickets by type (Bug, Story, Task)

Note: The GitHub activity and Jira tickets cards need GitHub and Jira to be connected under Settings > Integrations.

3.8.2. Generate Insights and the Weekly Summary

Step 1: Click Generate Insights (next to the project tabs) to refresh the data. "Last synced" shows when it was last updated.

Step 2: In the Weekly summary card, click Generate summary if it says "No summary generated yet for this week".

Step 3: Once a summary exists, click Regenerate summary to create a fresh one.

3.8.3. View Developer Insights

Developers see the Developer Insights page instead of Manager Insights. It shows your own productivity, workload and development activity.

Step 1: Click Insights in the left menu.

Step 2: Use the dropdown at the top right (for example Last 4 weeks) to change the period the cards cover.

Step 3: Read the Weekly summary at the top. It is an AI-generated overview of your recent activity. If it says "No summary generated yet for this week", click Generate summary.

Step 4: While the summary is being made, the card shows "Generating your weekly summary..." and the button shows Generating.... Wait for it to finish. The finished summary appears in the same card, and you can click Generate summary again to refresh it.

Step 5: Under Your overview, check these cards:

- Productivity score: your score out of 100, how it changed compared with last week, and a trend line for the period
- GitHub activity: hours logged, commits and active days
- Jira tickets: your assigned tickets in total, with how many are To Do, In Progress and Done

Step 6: Under Time & estimates, check these cards:

- Time allocation: total hours logged, grouped by activity such as Feature Dev, Bug Fixes, Code Review and Meetings
- Estimate vs actual: how closely your estimates match your logged time, with an accuracy badge and bars per activity

Step 7: Under Work patterns, check these cards:

- Burnout scale: a workload signal from Low to High, with a risk label such as LOW RISK
- Task switching: how often your work changes between tasks on each day of the week
- Time split by task: the hours and share of your time on each task, including untracked time
- My projects: the hours you have logged on each active project

Note: The GitHub activity and Jira tickets cards need GitHub and Jira to be connected under Settings > Integrations. Insights are guidance only, so use them as a prompt to look at how you work rather than as a score to chase.

3.9. Approving Timesheets

Managers review the timesheets that their team submits on the Timesheet Approvals page.

3.9.1. Review a Submitted Timesheet

Step 1: Click Timesheets in the left menu, or click Review approvals on the Dashboard.

Step 2: The Timesheet Approvals page shows how many timesheets are Awaiting review. Use the tabs (All, Submitted, Approved and so on) to filter the list.

Step 3: Click View on an employee's row. A window opens with the employee name, the week, the Status, Submitted On, Total Hours and a table of hours per task for each day.

Step 4: Choose what to do with the timesheet: click Approve, click Reject to send it back for corrections, click AI Review to check the evidence, or click Close. Rejecting needs a reason, which the employee sees on their timesheet.

3.9.2. Use AI Review (Evidence Review)

Step 1: In the timesheet window, click AI Review.

Step 2: The Evidence Review window compares the timesheet with GitHub, Jira and calendar activity and shows a confidence level with a recommendation, for example "Low confidence" and "Likely reject".

Step 3: Under Evidence found, check what each source found. A source shows "not connected" when that integration is not connected under Settings.

Step 4: Read Why this matters for an explanation of the result.

Step 5: Click View details to go back to the timesheet, or click Reject timesheet to reject it.

Note: AI Review is a recommendation only. The manager decides whether to approve or reject.

3.10. Settings

Use Settings to manage your password, security, integrations and account.

The page has three sections: Account & Security, Integrations and Account Management. Click Settings in the left menu to open it.

3.10.1. *Change Your Password*

Step 1: Click Settings in the left menu.

Step 2: Under Account & Security, click Change next to Password.

Step 3: Follow the on-screen prompts to enter and save your new password.

3.10.2. *Turn On Multi-Factor Authentication (MFA)*

Step 1: Under Account & Security, find Multi-factor authentication (MFA). It shows Disabled when it is off.

Step 2: Switch the toggle on and follow the on-screen prompts to link your authenticator app.

Note: Once MFA is on, you will need the code from your authenticator app each time you sign in.

3.10.3. *Manage Integrations*

Step 1: Under Integrations you will see GitHub (sync pull requests, commits and repositories), Jira (import issues, track work and link time entries) and Google Calendar (sync your calendar events and availability).

Step 2: Use the toggle next to an integration to connect or disconnect it. Connected shows in green when it is active.

Step 3: Click the arrow at the right of an integration to see its details, or click Request an integration to ask for a new one.

3.10.4. *Request Account Deletion*

Step 1: Under Account Management, click Request deletion.

Step 2: Follow the on-screen prompts to confirm your request.

Note: This permanently deletes your account and all associated data.

4. FAQ and Troubleshooting

Q1. Why is my email verification not working?

After you sign up, Momently sends a verification link to your work email. If it does not work:

- Check your spam or junk folder for the verification email
- Make sure you clicked the link within 24 hours
- If the link expired, request a new one
- Check that you typed your work email correctly when you signed up

Q2. I forgot my password. What do I do?

On the sign in page, click Forgot password? under the password box and follow the prompts. If you are already signed in and just want a new password, go to Settings, then Account & Security, and click Change next to Password.

Q3. Can I sign in with Google or Microsoft?

Yes. The sign in and sign up pages have Google and Microsoft buttons under the email and password fields. Use the same work email you registered with.

Q4. How do I turn on multi-factor authentication (MFA)?

Go to Settings and find Multi-factor authentication (MFA) under Account & Security. It shows Disabled when it is off. Switch the toggle on and follow the prompts to link your authenticator app. Once MFA is on, you need the code from your authenticator app every time you sign in.

Q5. Why can't I start a timer?

Check these things:

- You might already have a timer running. Only one timer can run at a time, so stop the current one before starting another
- You must pick a Project before Start Timer works. The Task and Notes fields are optional
- If your timesheet for that week is submitted or approved, timer and entry buttons are greyed out

Q6. What happens if I close the browser with a timer running?

The timer keeps running in the background. When you sign back in, you will see the active timer on your Dashboard and in the Timer Running box at the bottom of the left menu, and you can stop it from there.

Q7. Can I pause a timer without losing time?

Yes. Click Pause while the timer is running, then Resume when you are ready. The system tracks pause time separately, so your break is not counted as work.

Q8. What is the difference between TIMER and MANUAL entries?

The Type column in Today's Entries shows how an entry was created. TIMER entries come from the start and stop timer. MANUAL entries are ones you typed in with the start and end times yourself. Both count towards your timesheet the same way.

Q9. Why can't I add or edit a time entry?

Time entries are locked once a timesheet is submitted or approved. You will see a banner at the top of the Log Time page (for example "The timesheet is awaiting review" or "Timesheet has been approved and is locked"), and the Add Manual Time Entry, Start Automatic Time Entry and Submit Timesheet buttons are greyed out. While a timesheet is still a Draft, you can edit its entries.

Q10. Why can't I add an entry for an earlier date?

You can only add time entries within 2 working days of the actual date. Also remember that a manual entry is saved for the date shown at the top right of the Log Time page, so choose the correct date there before you click Add Manual Time Entry.

Q11. How do I submit my timesheet?

Open the Log Time page, check your entries for the week, and click Submit Timesheet at the top right. The badge changes to SUBMITTED and your manager can now review it.

Q12. I submitted my timesheet by mistake. Can I change it?

Not yourself. Once submitted, the entries are locked. Ask your manager to reject the timesheet. A rejected timesheet is returned to you for corrections, and you can then fix it and submit it again.

Q13. Why was my timesheet rejected?

Open Timesheets, click the Rejected tab and open the week. The manager's reason is shown on the timesheet. Common reasons include missing entries, incorrect hours or missing descriptions. Fix the entries and submit again, or speak to your manager if the reason is not clear.

Q14. Who approves my timesheet?

Your manager reviews it. Managers and admins see a Review Timesheets tab on the Timesheets page and a Pending approvals card on their Dashboard. Developers do not see these.

Q15. What are the different timesheet statuses?

A timesheet is always in one of these states:

- DRAFT: you can still edit entries
- SUBMITTED: waiting for manager approval, entries are locked
- APPROVED: your manager approved it, entries are locked
- REJECTED: your manager returned it for corrections

Q16. What does AI Review do when I approve timesheets?

AI Review compares a timesheet with GitHub, Jira and calendar activity and shows a confidence level with a recommendation. It is a suggestion only. You decide whether to approve or reject. If a source says "not connected", connect it under Settings, then Integrations, for a fuller comparison.

Q17. Why can't I see a project I expect to be on?

Developers only see projects they are assigned to. Ask the project manager or an admin to add you. Managers and admins see more, including budget and cost details.

Q18. Why can't I see Edit project, New project or the Team Tasks tab?

These are manager tools. Edit project is shown to managers of that project, New project is on the Team page, and Team Tasks is available to managers and admins. If you need one of them, ask your admin to check your role.

Q19. Why does my task list look empty?

Your filters are probably hiding tasks. On My Tasks, set the Status dropdown to All, tick Show Completed and Show Blocked, and clear the search box. Then check that the task is assigned to you.

Q20. How do I link a task to Jira?

When you create a task, enter an existing Jira ticket in Jira ticket key, or use the Create Jira issue option. For an existing task, click the diamond button next to View. A sync icon appears once the task is linked. You can also click Connect to Jira at the top of My Tasks, and make sure Jira is connected under Settings, then Integrations.

Q21. Why does Insights say GitHub or Jira is not available?

Those cards and the forecast evidence need GitHub and Jira to be connected. Go to Settings, then Integrations, switch the toggle on for each one, and check that it shows Connected in green.

Q22. Why is there no weekly summary?

The Weekly summary is generated on request. If the card says "No summary generated yet for this week", click Generate summary and wait for the Generating... message to finish. Click it again later to refresh the summary.

Q23. Why does my project forecast say AT_RISK or show a delay?

The forecast compares your progress and hours against the planned end date. Open the Forecast tab of the project and read the AI Forecast Explanation. Contributing Factors lists the reasons, such as tasks not yet completed or slow recent progress, and Recommendations suggests what to do next. Managers can click Sync Forecast to refresh it.

Q24. Why does the forecast show limited velocity data or MEDIUM confidence?

Confidence depends on how many evidence signals are available, for example 4 of 6. Limited velocity data means there is little recent time tracking. To improve it, log time against tasks, add estimated hours to tasks and connect GitHub and Jira. Accuracy improves as more work is logged.

Q25. Why is my calendar empty?

The Calendar is read-only and only shows events after you connect a calendar. Click Connect calendar at the top right, or connect Google Calendar under Settings, then Integrations.

Q26. How do I delete my account?

Go to Settings, then Account Management, and click Request deletion. Follow the prompts to confirm. This permanently deletes your account and all associated data, so be sure before you confirm.
