1. Purpose

This document defines the acceptance criteria for **Epic 5 - Project & Task Management**.

Acceptance criteria describe the conditions that must be met before a feature can be considered complete. They provide a shared understanding between developers, testers, and stakeholders, and form the basis for creating manual and automated test cases.

The criteria in this document follow the **Given / When / Then** format to ensure consistency and traceability throughout the project.

2. Epic Overview

Epic 5 - Project & Task Management

This epic introduces project and task management functionality into Momently. It allows administrators to create projects and assign teams, managers to create and assign tasks, employees to view their assigned work, and administrators to archive or restore projects. Managers can also organise projects using custom tags.

3. Acceptance Criteria

E5.1 Create Project

Related Epic: E5.1 - Project Creation & Team Assignment

AC 5.1.1 - Create a Project

Given an Administrator is on the Create Project page

When they enter a valid project **name**, **description**, **start date**, and **end date** and click **Create**

Then

- the project is successfully created
- the project is saved to the database
- a success message is displayed
- the project appears in the active project list

AC 5.1.2 - Required Field Validation

Given an Administrator is creating a project

When one or more required fields are left empty

Then

- the project is not created
- validation messages are displayed beside the missing fields
- the Administrator remains on the Create Project page

AC 5.1.3 - Invalid Date Validation

Given an Administrator is creating a project

When the end date is before the start date

Then

- the project is not created
- an appropriate validation message is displayed

E5.1 Assign Teams to a Project

Related Epic: E5.1 - Project Creation & Team Assignment

AC 5.1.4 - Assign Teams

Given a project already exists

When an Administrator selects one or more teams and saves the changes

Then

- the selected teams are assigned to the project
- the assignment is saved successfully
- the updated team information is displayed

AC 5.1.5 - Team Access Control

Given teams have been assigned to a project

When employees attempt to log time or receive tasks

Then

- only employees belonging to the assigned teams are authorised
- unauthorised users receive an appropriate error message

E5.2 Create Task

Related Epic: E5.2 - Task Creation & Assignment

AC 5.2.1 - Create Task

Given a Manager is viewing an existing project

When they enter valid task information and create the task

Then

- the task is created successfully
- the task is linked to the selected project
- the task appears in the project's task list

AC 5.2.2 - Required Task Information

Given a Manager is creating a task

When required information is missing

Then

- the task is not created
- validation messages are displayed

E5.2 Assign Task to a Project Member

Related Epic: E5.2 - Task Creation & Assignment

AC 5.2.3 - Assign Task

Given a task exists

When a Manager assigns the task to a valid project member

Then

- the assignment is saved successfully
- the assigned employee can view the task

AC 5.2.4 - Invalid Assignment

Given a task exists

When a Manager attempts to assign the task to a user who is not part of the project team

Then

- the assignment is rejected
- an appropriate error message is displayed
- no assignment is saved

E5.3 View Assigned Tasks

Related Epic: E5.3 - My Assigned Tasks View

AC 5.3.1 - View Active Tasks

Given an Employee is logged into the system

When they open the My Tasks page

Then

- all active tasks assigned to the employee are displayed
- completed and archived tasks are hidden by default

AC 5.3.2 - No Assigned Tasks

Given an Employee has no assigned tasks

When they open the My Tasks page

Then

- no errors occur
- an informative message is displayed indicating that there are no assigned tasks

E5.3 Filter Tasks

Related Epic: E5.3 - My Assigned Tasks View

AC 5.3.3 - Filter Completed Tasks

Given completed tasks exist

When the Employee enables the Completed filter

Then

- completed tasks are displayed

AC 5.3.4 - Filter Archived Tasks

Given archived tasks exist

When the Employee enables the Archived filter

Then

- archived tasks are displayed

AC 5.3.5 - Remove Filters

Given one or more filters are enabled

When the Employee clears all filters

Then

- only active tasks are displayed

E5.4 Archive Project

Related Epic: E5.4 - Archive Completed Projects

AC 5.4.1 - Archive Project

Given an active project exists

When an Administrator archives the project

Then

- the project is removed from the active project list
- the project remains stored in the database
- a success message is displayed

AC 5.4.2 - Archived Project Restrictions

Given a project has been archived

When employees attempt to log time

Then

- the archived project is not available for selection

E5.4 Restore Archived Project

Related Epic: E5.4 - Archive Completed Projects

AC 5.4.3 - Restore Project

Given an archived project exists

When an Administrator restores the project

Then

- the project becomes active again
- it appears in the active project list
- it can once again be used for time logging

E5.5 Project Tags

Related Epic: E5.5 - Filter by Project Tags

AC 5.5.1 - Add Project Tags

Given a Manager is creating or editing a project

When they add one or more tags and save the project

Then

- the tags are saved
- the tags are displayed with the project

AC 5.5.2 - Filter Projects by Tags

Given projects contain tags

When a user selects one or more tag filters

Then

- only matching projects are displayed
- the project list updates correctly

4. Traceability

Each acceptance criterion in this document is linked to its corresponding GitHub Issue and Epic. These acceptance criteria will be used to develop:

- Manual Test Cases
- Unit Tests
- Integration Tests
- End-to-End Tests
- User Acceptance Testing (UAT)

Once the final Functional Requirements document is updated to include Epic 5, the related Functional Requirement IDs will also be referenced to maintain full requirements traceability.
