1. Purpose

This document defines the manual test cases for **Epic 5 - Project & Task Management**.

The purpose of these test cases is to verify that every feature works as expected before it is merged into the project.

Each test case is linked to the corresponding Acceptance Criteria and Functional Requirement to ensure full traceability throughout development and testing.

All developers should complete the relevant test cases before submitting a Pull Request.

2. Test Case Structure

Each test case includes the following information.

Field	Description
Test ID	Unique identifier for the test case
Test Name	Follows the <code>should_[behavior]_when_[condition]</code> naming convention
Test Scenario	A short description of what is being tested
Preconditions	Requirements that must be met before testing
Test Steps	Steps to perform during testing
Expected Result	The expected outcome if the feature works correctly
Priority	High, Medium or Low

3. Epic 5 Test Cases

E5.1 Create Project

Test Case: TC-E5.1.1

Test Name

`should_saveProject_when_dataIsValid`

Description

Verify that an Administrator can successfully create a project using valid information.

Primary Actor

Administrator

Priority

High

Preconditions

- Administrator is logged in.
- Administrator has permission to create projects.

Test Steps

1. Open the **Create Project** page.
2. Enter a valid project name.
3. Enter a valid project description.
4. Select a valid start date.
5. Select a valid end date.
6. Click **Create Project**.

Expected Result

- Project is successfully created.
- Project is saved to the PostgreSQL database.
- Success message is displayed.

- Project appears in the project list.

Test Case: TC-E5.1.2

Test Name

`should_blockCreation_when_requiredFieldsAreMissing`

Description

Verify that the system prevents a project from being created when required fields are missing.

Primary Actor

Administrator

Priority

High

Preconditions

- Administrator is logged in.

Test Steps

1. Open the Create Project page.
2. Leave one or more required fields empty.
3. Click Create Project.

Expected Result

- Validation messages are displayed.
- Project is not created.
- No data is saved to the database.

Test Case: TC-E5.1.3

Test Name

should_blockCreation_when_endDateIsBeforeStartDate

Description

Verify that the system prevents project creation when the end date is before the start date.

Primary Actor

Administrator

Priority

High

Preconditions

- Administrator is logged in.

Test Steps

1. Open the Create Project page.
2. Enter an end date before the start date.
3. Click Create Project.

Expected Result

- An error message is displayed.
- Project is not created.

E5.1 Assign Teams to a Project

Test Case: TC-E5.1.4

Test Name

should_assignTeams_when_validTeamsAreSelected

Description

Verify that an Administrator can assign one or more teams to a project.

Primary Actor

Administrator

Priority

High

Preconditions

- Project already exists.
- Teams already exist.

Test Steps

1. Open the project.
2. Select one or more teams.
3. Save the changes.

Expected Result

- Teams are successfully assigned to the project.
- Assignment is saved in the database.

Test Case: TC-E5.1.5

Test Name

`should_denyAccess_when_userIsNotAssignedToProject`

Description

Verify that users who are not assigned to a project's team cannot log time against that project.

Primary Actor

Employee

Priority

High

Preconditions

- Project has assigned teams.
- User is not a member of the assigned team.

Test Steps

1. Login as a user who is not assigned to the project.
2. Attempt to log time against the project.

Expected Result

- Access is denied.
- An appropriate error message is displayed.

E5.2 Create Task

Test Case: TC-E5.2.1

Test Name

`should_createTask_when_dataIsValid`

Description

Verify that a Manager can successfully create a task using valid information.

Primary Actor

Manager

Priority

High

Preconditions

- Manager is logged in.
- Project already exists.

Test Steps

1. Open the project.
2. Click Create Task.
3. Enter a valid task name.
4. Enter a valid task description.
5. Click Save.

Expected Result

- Task is created successfully.
- Task is linked to the selected project.
- Task is saved in the database.
- Task appears in the project task list.

Test Case: TC-E5.2.2

Test Name

`should_blockTaskCreation_when_taskNameIsBlank`

Description

Verify that the system prevents a task from being created when the task name is missing.

Primary Actor

Manager

Priority

High

Preconditions

- Manager is logged in.
- Project already exists.

Test Steps

1. Open the project.
2. Click Create Task.
3. Leave the task name field empty.
4. Click Save.

Expected Result

- Validation message is displayed.
- Task is not created.
- No data is saved to the database.

E5.2 Assign Task to a Project Member

Test Case: TC-E5.2.3

Test Name

`should_assignTask_when_userBelongsToProjectTeam`

Description

Verify that a Manager can assign a task to a valid project team member.

Primary Actor

Manager

Priority

High

Preconditions

- Manager is logged in.
- Project already exists.
- Task already exists.
- Employee is a member of the project team.

Test Steps

1. Open the task.
2. Select a valid project team member.
3. Click Assign.

Expected Result

- Task assignment is successful.
- Assignment is saved in the database.
- Employee can view the task in their task list.

Test Case: TC-E5.2.4

Test Name

`should_rejectAssignment_when_userIsNotPartOfProjectTeam`

Description

Verify that the system rejects task assignments for users who are not part of the project team.

Primary Actor

Manager

Priority

High

Preconditions

- Manager is logged in.
- Project already exists.
- Task already exists.
- Selected user is not a member of the project team.

Test Steps

1. Open the task.
2. Select a user who is not part of the project team.
3. Click Assign.

Expected Result

- Assignment is rejected.
- Error message is displayed.
- Task remains unassigned.

E5.3 View Assigned Tasks

Test Case: TC-E5.3.1

Test Name

`should_displayAssignedTasks_when_tasksExist`

Description

Verify that an Employee can view all active tasks assigned to them.

Primary Actor

Employee

Priority

High

Preconditions

- Employee is logged in.
- Employee has one or more assigned tasks.

Test Steps

1. Open the My Tasks page.

Expected Result

- Only tasks assigned to the logged-in employee are displayed.
- Active tasks are shown by default.
- Each task displays its name, project and status.

Test Case: TC-E5.3.2

Test Name

`should_displayEmptyState_when_noTasksExist`

Description

Verify that the system shows a helpful message when an employee has no assigned tasks.

Primary Actor

Employee

Priority

Medium

Preconditions

- Employee is logged in.
- Employee has no assigned tasks.

Test Steps

1. Open the My Tasks page.

Expected Result

- A No tasks assigned message is displayed.
- The page loads without errors.

E5.3 Filter Tasks

Test Case: TC-E5.3.3

Test Name

`should_displayCompletedTasks_when_completedFilterIsApplied`

Description

Verify that completed tasks are displayed when the Completed filter is applied.

Primary Actor

Employee

Priority

Medium

Preconditions

- Employee has completed tasks.

Test Steps

1. Open My Tasks.
2. Enable the Completed filter.

Expected Result

- Completed tasks are displayed.
- Task list updates correctly.

Test Case: TC-E5.3.4

Test Name

`should_displayArchivedTasks_when_archivedFilterIsApplied`

Description

Verify that archived tasks are displayed when the Archived filter is applied.

Primary Actor

Employee

Priority

Medium

Preconditions

- Employee has archived tasks.

Test Steps

1. Open My Tasks.
2. Enable the Archived filter.

Expected Result

- Archived tasks are displayed.
- Task list updates correctly.

Test Case: TC-E5.3.5

Test Name

`should_displayActiveTasks_when_filtersAreCleared`

Description

Verify that the default active task list is restored when all filters are cleared.

Primary Actor

Employee

Priority

Medium

Preconditions

- One or more filters are currently applied.

Test Steps

1. Clear all active filters.

Expected Result

- Only active tasks are displayed.
- Completed and archived tasks are hidden by default.

E5.4 Archive Project

Test Case: TC-E5.4.1

Test Name

`should_archiveProject_when_archiveIsSelected`

Description

Verify that an Administrator can archive a project.

Primary Actor

Administrator

Priority

High

Preconditions

- Project already exists.

Test Steps

1. Open the project.
2. Click Archive.
3. Confirm the action.

Expected Result

- Project is marked as archived.
- Project is removed from the active project list.
- Project remains stored in the database.

Test Case: TC-E5.4.2

Test Name

`should_preventTimeLogging_when_projectIsArchived`

Description

Verify that archived projects cannot be used for time logging.

Primary Actor

Employee

Priority

High

Preconditions

- Project has been archived.

Test Steps

1. Open the Log Time page.
2. Attempt to select the archived project.

Expected Result

- Archived project does not appear in the project selection list.
- Time entry cannot be created for the archived project.

E5.4 Restore Project

Test Case: TC-E5.4.3

Test Name

`should_restoreProject_when_restoreIsSelected`

Description

Verify that an Administrator can restore an archived project.

Primary Actor

Administrator

Priority

Medium

Preconditions

- Archived project exists.

Test Steps

1. Enable Show Archived.
2. Select the archived project.
3. Click Restore.

Expected Result

- Project becomes active again.
- Project appears in the active project list.
- Project can be used for time logging again.

E5.5 Project Tags

Test Case: TC-E5.5.1

Test Name

should_saveProjectTags_when_tagsAreAdded

Description

Verify that project tags are saved successfully.

Primary Actor

Manager

Priority

Medium

Preconditions

- Project already exists.

Test Steps

1. Open the project for editing.
2. Add one or more custom tags.
3. Click Save.

Expected Result

- Tags are saved successfully.
- Tags appear on the project details page.
- Tag data is stored in the database.

E5.5 Filter Projects by Tags

Test Case: TC-E5.5.2

Test Name

`should_filterProjects_when_tagsAreSelected`

Description

Verify that projects can be filtered using one or more tags.

Primary Actor

Manager

Priority

Medium

Preconditions

- Multiple projects exist with different tags.

Test Steps

1. Open the project list.
2. Select one or more tags from the filter options.

Expected Result

- Only projects matching the selected tags are displayed.
- Project list updates immediately after filtering.

4. Test Execution Checklist

Before marking a feature as complete:

- All High priority test cases have passed.
- Acceptance Criteria have been met.
- No critical bugs remain.
- Unit tests pass.
- Integration tests pass.
- End-to-End tests pass (where applicable).
- Feature has been tested against the integrated frontend, backend, and PostgreSQL database.
- Feature is ready for peer review.

5. Testing Standards

All automated tests should follow the **Arrange - Act - Assert (AAA) pattern**.
